Yunlong Li

Computer Science Student · Full-stack, Frontend & Mobile Developer

Bangkok, Thailand
yunlongli518@gmail.com
github.com/XYDragon603

Computer Science student at Mahidol University International College who builds practical products across full-stack web development, Flutter, WeChat Mini Programs, database design, and automation. Seeking internship opportunities where I can contribute to real product development and continue growing as an engineer.

EDUCATION

Mahidol University International College — Bangkok, Thailand

Bachelor's degree studies in Computer Science

SELECTED PROJECTS

MedMinder — Medication Reminder & Tracking Platform

React · TypeScript · Spring Boot · PostgreSQL

Full-stack educational platform supporting user, caregiver, and administrator workflows.

- Built medication schedules, dose logging, refill alerts, history, monthly adherence reports, caregiver access, and administrative audit tools.
- Implemented REST APIs, role-based access control, a normalized relational schema, reusable frontend components, and environment-based deployment configuration.

Air Health — Fitness & Nutrition Mini Program

WXML · WXSS · JavaScript · Cloud Functions

Native WeChat Mini Program for structured training and daily nutrition tracking.

- Designed workout-plan, training-log, history, nutrition, and statistics experiences with local persistence.
- Added photo/album/manual nutrition entry flows and prepared a cloud-function integration path for food recognition.

Almanac Intelligence — Flutter Analysis Application

Flutter · Dart · JSON Rule Engine

Multi-page mobile application combining calendar conversion, deterministic rules, local history, and optional AI explanations.

- Separated models, repositories, services, and UI pages; loaded structured rule data from versioned JSON assets.
- Implemented local settings/history persistence and tests for core calculation and rule-matching logic.

Wedding Memoir — Bilingual Wedding Website

HTML · CSS · JavaScript · Cloudflare D1

Responsive personal website combining a wedding story, optimized photo galleries, music, themes, and an online guestbook.

- Separated bilingual content from the page layout, generated WebP assets, and built a Worker API backed by D1 for guest messages.

TECHNICAL SKILLS

Languages	TypeScript, JavaScript, Java, Dart, Python, SQL, HTML, CSS
Frontend & Mobile	React, Vite, Flutter, WeChat Mini Programs, responsive UI
Backend & Data	Spring Boot, Spring Security, REST APIs, PostgreSQL, Cloudflare D1, Hibernate ORM
Tools & Delivery	Git, GitHub, Docker, GitHub Actions, Cloudflare Workers, Vercel, Playwright
